WHALE-ash

The Whale-ash Collection has an elegant and strong design style, inspired by the whale skeleton. This special collection is designed with a unique balance of sustainable and natural materials combined with high quality Teak wood. While strong and thick lines on the vertical plane make its design clear, its structure on the horizontal plane attracts attention. In addition to its skeletal structure, wide seat details that increase comfort make the Whale Collection a comfortable experience for its users, not only aesthetically but also ergonomically. SNOOC Collections with Sumbrella fabric details suitable for Natural Teak and Black Teak color options, and a coffee table designed from sand and epoxy materials; The seating and dining set and daybed are included.

EASTON

Inspired by modern design, the Easton Collection represents the power of simplicity. Combining materials with a unique effect, the architectural aluminum frame determines the form of the seating group, while the durable synthetic rattan material emphasizes its suitability for all weather conditions. The seamless combination of textures makes the curves and angles in the design even more evident. At the same time, the arm detail collection supported by Teak tree offers a high level of performance in terms of aesthetics as well as seating comfort. In open areas with two color alternatives: It replaces the lounge set, dining set and chaise lounge.

CUE

The Cue Collection brings together its distinctive material details with an aluminum frame through its linear design and unique skeletal curvature. Emphasizing minimalist design principles with clean and powerful lines, this collection completes unity with seating groups and complementary pieces in open and semi-open spaces. While contributing aesthetic value to its surroundings, this collection seamlessly merges durability and functionality. The ability to create different combinations with each piece provides users with the opportunity to diversify their emotional experiences. With a modern design language, the collection offers all season usability through its new-generation material and the aluminum skeleton that dominates all pieces.

SWAN

Swan Collection creates a strong sense of contrast with its rounded form and strong lines. Symbolizing all the principles of modern design understanding, the collection makes the feeling of craftsmanship felt with contemporary style codes in synthetic rattan knitting details. The synthetic rattan knitting technique, which is made with high quality handwork that surrounds the U-shaped aluminum framed design, creates a unique aesthetic perception in which different materials combine elegance and character. The harmony of minimalist lines with new generation sustainable materials synthesizes ergonomic details with the value given to human scale. Emphasizing modern design principles with simple and strong lines, the Swan Collection allows you to create a complete outdoor fiction with a lounge set, a dining table set and a daybed. With the Swan Collection, which allows you to create privileged living spaces with its inviting simplicity in outdoor installations, it offers the possibility of using it in your garden, terrace, winter garden and balcony for four seasons.

ELISA

Elisa Collection combines comfort with solid lines, modern silhouettes, and elegant curves. The Elisa Collection adapted from Danish design and is a magnificent example of the design culture it belongs to: within the framework of the architectural principle it represents, says: 'Form follows function, operating the structure with functionality. SNOC adapts the interior design to open spaces with the Elisa Collection; it blends the old natural materials like aluminum with synthetic ones to make it suitable for outdoor use in all seasons. The dynamism provided by parallel and knitted body skeleton lines harmonizes visual and tactile comfort with its soft texture and colors, being, moreover, water-repellent and stain proof. The exciting details of the Elisa Collection further strengthen the architectural stance of the design.

AGATE

Agate Umbrella combines UV-resistant and wind-resistant special fabric and aluminum skeleton synthesis with modern design lines. While creating a modern look with aesthetic refinement in your outdoor areas; Agate umbrella, which allows you to create large shaded areas against the sun's rays, allows you to make various combinations with two different color options. With its adjustable umbrella head, it makes it easier for you to protect yourself from the sun's rays by shading in your open and semi-open areas at any time of the day. Agate Umbrella, which offers the possibility of customizing your outdoor installations in four seasons, promises long-lasting use with its contrasting geometric form and a new generation of sustainable material balance.

DESIGN SERVICE

SNOC has become synonymous with attention to quality, service, and meticulous detail. Its design philosophy goes beyond aesthetics, shaping a lifestyle that not only embraces beauty but also forms a deep connection with the user through emotions, nourishing and inspiring a way of life. Creating a modern outdoor lifestyle and presenting a design that tells our story are fundamental in the design process. In line with all these principles, SNOC, through its professional team, helps users transform their design needs into something special and personal, regardless of time and place.

MATERIALS

SNOC continues to offer collections that combine its unique design philosophy with high-quality materials, bringing together aesthetics and functionality. Each design achieves a perfect balance of aesthetics, durability, and functionality, providing a modern atmosphere in outdoor spaces. In all its collections, SNOC prefers sustainable and eco-friendly materials. This sense of responsibility reflects the mission of offering products designed not only for aesthetic appeal but also with environmental awareness.

Synthetic Rattan

Synthetic Rattan is a new generation material that is highly respectful to nature due to its sustainability. It requires very little maintenance, is extraordinarily light, and is resistant to weather conditions, making it one of the most preferred materials for outdoor furniture.

Outdoor furniture made of Synthetic Rattan is woven in a wicker style to achieve a classic outdoor look. Synthetic Rattan should not be confused with natural Rattan, which fades when exposed to sunlight and is generally used indoors. Synthetic Rattan furniture is highly resistant to harsh outdoor conditions.

Made with premium Synthetic Rattan, our products are UV resistant and can be left outside all year round. Combined with the aluminum frame, it gives the garden furniture a very light and durable identity. You can clean your synthetic Rattan furniture with a damp cloth consisting of a mild soapy water solution.

Teak Wood

Living material that continues to live!

Teak is a hardwood with a high natural oil content. This makes it durable, highly resistant to rot, but also resistant to sun and rain. The combination of these properties makes Teak wood ideal for all outdoor applications. Only premium grown teak is used for the production of Snoc furniture. The features of top quality teak wood are straight grained structure, no cracks or cracks, and the only color that spreads throughout the wood. These properties combined with the high density of the wood prevent bending and rotting, ensuring that the furniture remains outside in all conditions without maintenance or preservatives. However, just like any wood species, teak is a living material and therefore temperature and humidity fluctuations can cause surface cracking and especially end veins. This is normal and does not affect the durability or strength of the wood.

Concrete

A modern outdoor statement, our concrete tables and coffee tables are crafted of a custom composite. Concrete offers an industrial look with inherent variations in texture, color and shading that contribute to its unique character.

Recommend more regular sealing especially for outdoor use or heavy soiling from acid / oil based foods and liquids. Apply liberally with a soft nonabrasive cloth and working quickly rub the wax into the product sometimes applying the wax with a pre-moistened wet rag will help the wax be applied more easily.

Acrylic Rope

Soft but strong!

The rope is another material used in our furniture suitable for all weather conditions. Our rope knitting furniture is made of acrylic. It is environmentally friendly and recyclable. Our rope knit furniture is designed to withstand all weather conditions like our other synthetic materials. Thanks to this high strength, you can use our rope knitting furniture in all four seasons of the year and leave it outdoors comfortably. To clean the stains that may occur on your rope-knit furniture, we recommend that you spray the soapy water solution you have prepared with the help of a spray on the relevant area and then wipe it gently with a soft cloth. Rinse the soapy water thoroughly from the product and remove excess moisture from the thread with a dry cloth. Then let it air dry. We recommend that you avoid using high-pressure water on your rope-knitted furniture.

Aluminum

Lightweight and durable!

Aluminum material has an outstanding strength to weight ratio, and this ratio gives aluminum the feature of being a highly durable, very light, and hard metal. These properties make it an ideal material for outdoor furniture. On the surface of aluminum materials used by SNOG in its products, corrosion resistance is gained by applying the thin chrome plating process. The treated frame is then coated with electrostatic powder paint. The electrostatic application method penetrates all surfaces of the metal and creates a homogeneous surface far beyond conventional paint surfaces. The resulting surface becomes resistant to impacts, scratches, and moisture and highly resistant to corrosion.

Acacia Wood

Living material that continues to live!

Users of outdoor furniture made of acacia wood highly appreciate the durability of their products for many years, the high resistance to scratches, even after processing and shaping, due to its hard surface. With Acacia Wood, a lighter and more natural appearance can be achieved than Teak wood. However, Acacia Wood requires maintenance, just like your Teak furniture. With appropriate and correct processes, you can protect the health and originality of your furniture for many years. All of the Acacia trees used by SNOC to produce furniture and accessories consist of industrially grown, licensed, and certified raw materials.

Textilen

Textilen is a fabric woven from strong polyester yarns individually coated with PVC, designed specifically for outdoor use. This product is a suitable choice for furniture as it is elegant, strong, comfortable and resistant to outdoor conditions. The last thing you can think of about textile should be its maintenance and cleaning. Textilen is designed for outdoor use and easy maintenance. Textilen fabric can be cleaned very easily with soapy soft cloth and water. With the soft cloth, apply the soap to the fabric and rinse with clean water to remove soap residue. In fact, do not use pressurized water in your outdoor furniture. For tougher stains, add 1/4 cup of bleach to soapy water. Then rinse thoroughly with clean water. Avoid exposure to products such as sunscreen and bronzer as this can stain textile fabric.

TECHNICAL SPECIFICATIONS

SNOC continues to offer a modern experience for outdoor spaces. You can visit <https://productgallery.snoc.com.tr/> to explore the technical specifications, 2D and 3D files, images, and other catalogs of SNOC products, which stand out with their original collections and high-quality materials.
