## Coperture

Architettura tessile

*In the textile architecture industry, Frech roofs perfectly blend strength and lightness.*

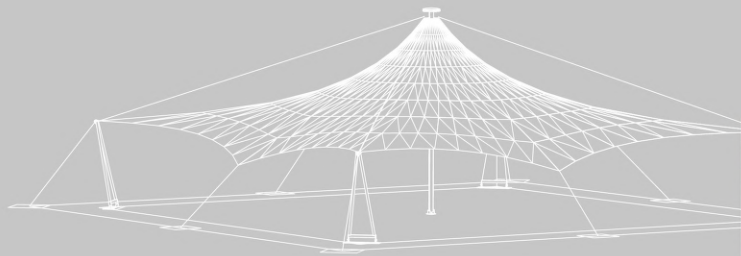

*Supreme quality standard gazebos, tensile structures, tent-roofs, made in compliance with all regulations of the industry and with (EC) marking European certificates.*

*Frech roofs combine the resistance of the steel or aluminum bearing structures with the flexibility and lightness of textile materials. Features that make them particularly suitable for use in any kind of landscape context with minimally invasive environmental impact.*

*Light roofs, such as gazebos, capable of meeting the needs of the public and private sector. Small gazebos for creating sheltered areas in the garden or gazebos for large surfaces, capable of sheltering outdoor business areas against atmospheric agents.*

*Tensile structures and tent roofs are instead appropriate for setting up large surfaces, with projects customized for sheltering sports areas and market areas.*

## Sunshine System

MODULAR SOLAR PARKING

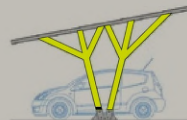

design F. Spada

**Sunshine** environmentally friendly, design, energy independence. A modular parking system with photovoltaic roof and excellent energy efficiency.

Designed for small and large areas, due to its adaptability and structural flexibility sunshine new products allow full integration with all types of architectural and urban environments.

Nature and hi-tech, eco-friendly, maximum energy efficiency for products which combine, with their natural functionality, style and energy production. Sunshine has for some time combined functionality with the widest sustainable mobility design, with national and international partners, research institutions and public institutions has promoted an integrated electrical network system with new eco-friendly urban transport.

A design for small and large urban centres for a real commitment to sustainable development with the use of clean energy sources.
