billiani
1911

Beyond Belonging

Billiani è nata nel 1911 dal superamento di una frontiera, quella tra Impero austroungarico e Regno d'Italia. Uno sconfinamento geografico che è diventato programmatico, chiave di lettura per il design, a cavallo fra tradizione e sperimentazione; per la produzione, artigianale e industriale; per i prodotti, che dagli spazi del contract si affacciano a quelli di casa. Confini che, oggi come allora, non sono limiti, ma opportunità.

Billiani was born in 1911 out of the crossing of a border, the one between the Austro-Hungarian Empire and the Kingdom of Italy. A border crossing that was to become so very influential, a key to design, straddling tradition and experimentation; for production, whether on a small or industrial scale; for the products themselves, the applications of which overlap in contract and residential settings. Borders that, today just as then, are not limits, but opportunities.

Billiani 1911

Billiani è un'azienda italiana che da più di un secolo produce sedie in legno. Si trova a Manzano, nel cuore di un distretto che sulla sedia ha costruito la sua fortuna e che vanta tuttora una filiera produttiva unica al mondo. Di questa cultura le sedie Billiani portano il segno e raccontano la storia. Il segno è la capacità di lavorare il legno, che si esprime attraverso un'estetica fatta di curvature, incastri e torniture più che di parole. La storia è la tradizione su cui Billiani s'innesta nel 1911 attraversando diverse età, senza paura di cambiare, prima di arrivare a quella attuale: l'età del design.

Billiani 1911

Billiani has been making chairs in Italy for well over a hundred years. The company is located in Manzano, in the heart of a district that has built its fortune based on chair manufacturing and which still boasts one of the world's unique production hubs. This culture is embedded in Billiani seating, as a storyteller. The sign is the ability to work wood, which is expressed through an aesthetic made of curves, joints and turnings rather than words. The story is the tradition that Billiani grafted onto in 1911, going through different ages, without fear of changing, before arriving at today's age of design.

Storia

Billiani nasce nel 1911 quando Luigi, falegname originario della Carnia, e la moglie Delina, figlia di un seggiolaio di Mariano, aprono un piccolo opificio a Manzano. Tra Manzano e Mariano ci sono poco più di dieci chilometri e un confine: quello che separa l'Impero austroungarico dal Regno d'Italia. L'impresa, che produce sedie in legno curvate e impagliate, è a conduzione familiare. Sono gli anni in cui inizia a prendere forma quello che nel secondo dopoguerra diventerà il distretto della sedia: saranno i figli di Luigi – i fratelli Ottone, Orlando, Lino e Bruno – a vivere da protagonisti gli anni del boom. Nel 1986 entra in azienda la terza generazione e Billiani diventa sinonimo di sedute per grandi commesse, soprattutto all'estero. Alla fine degli anni Novanta Luigi Billiani, che ha lo stesso nome del nonno e una formazione da architetto, decide di intraprendere la strada del design e insieme alla moglie Veronik Romanutti crea la Billiani di oggi.

History

Billiani started up in 1911 when Luigi, a carpenter originally from Carnia, and his wife Delina, daughter of a chair maker from Mariano, opened a small factory in Manzano. Between Manzano and Mariano there were just over ten kilometres as well as a border: the one that separated the Austro-Hungarian Empire from the Kingdom of Italy. The company, which produced curved and wicker wooden chairs, was family-run. These were the years in which what was to become the chair district began to take shape after the Second World War: Luigi's

children – the brothers Ottone, Orlando, Lino and Bruno – would experience the boom years as major players. In 1986 the third generation joined the company and Billiani became synonymous with seating for large orders, destined especially abroad. At the end of the nineties Luigi Billiani, who has the same name as his grandfather and had trained as an architect, decided to go down the design path and, together with his wife Veronik Romanutti, created the Billiani of today.

Design

Buon disegno e capacità di lavorare il legno sono da sempre la cifra dei prodotti Billiani, ma è dal 1997 che s'inizia a parlare concretamente di design. Il debutto è al Salone del Mobile di Milano del 2002, con uno stand provocatorio su cui sventola la bandiera del design: l'ha progettato Marco Ferreri, autore anche di una sedia che sfiora il Compasso d'Oro. Mentre il legame con la tradizione è assicurato dai progetti del maestro Werther Toffoloni, il sodalizio con Emilio Nanni apre una nuova era: colorata, pop, spensierata. L'elenco dei designer si allunga, così come quello dei progetti, alcuni dei quali entrano nei musei, dal MoMA di New York alla Triennale di Milano. La sedia resta centrale e il legno diventa il fil rouge della collezione. Nel 2019 la direzione artistica viene affidata a Cristina Celestino: l'immagine si fa più calda e sofisticata, i tessuti acquistano importanza, i prodotti si affacciano all'ambito domestico. La Billiani è finalmente adulta.

Design

Good design and woodworking ability have always been the hallmark of Billiani products, but it is only since 1997 that we have started to talk about design in concrete terms. The debut was at the 2002 Milan Furniture Fair, with a provocative stand on which flew the flag of design: Marco Ferreri designed it, also the author of a chair that was short-listed for the Compasso d'Oro. While the link with tradition was ensured by the projects of master Werther Toffoloni, the partnership with Emilio Nanni opened up a new era:

colourful, trendy, carefree. The list of designers grew, as did the list of projects, some of which were exhibited in museums, from the MoMA in New York to the Milan Triennale. The chair remained central and wood became the leitmotif of the collection. In 2019 artistic direction was entrusted to Cristina Celestino: the image has become warmer and more sophisticated, the choice of fabrics has become central, the products now also address domestic use. Billiani has finally come of age.

Produzione

Billiani produce al 100% all'interno del triangolo della sedia, un territorio di piccoli laboratori specializzati dove la cultura del legno ha radici profonde. Una filiera d'eccellenza fatta di aziende artigiane dalla storia secolare, ciascuna specializzata in una fase del lavoro. A tenere in vita questo tessuto produttivo, che ha rischiato di perdersi sulla spinta della delocalizzazione che ha svuotato i laboratori e ne ha disperso le capacità, sono anche i tecnici di Billiani. Ciascuno di loro segue i prodotti passo per passo: una garanzia di qualità ma anche un investimento sulla filiera, perché ogni innovazione arricchisce il know-how di tutto il distretto. È così che il made in Italy di Billiani acquista un valore che va oltre il prodotto in sé e diventa espressione di un patrimonio culturale e manifatturiero condiviso, oltre che di un'impresa di famiglia.

Produzione

Billiani produces 100% within the chair triangle, an area of small specialized workshops, each with a deep-rooted woodworking culture. A hub of excellence made up of companies with a centuries-old history of craftsmanship, each specializing in a particular phase of the work. Billiani's technicians also keep this productive ethos alive, which has risked getting lost within the relocation fad that has emptied workshops and dispersed talent. Each of them follows the products step by step: a guarantee of quality but also an investment in the overall supply chain because each innovation enriches the know-how of the whole district. This is how Billiani's Made in Italy has taken on a value that goes beyond the product itself to become an expression of a shared cultural and manufacturing heritage, as well as a family business.

Contract

Flessibilità produttiva e rapidità di risposta sono le prime caratteristiche richieste dal settore contract, e in questo senso gli anni delle grandi commesse internazionali sono stati per Billiani un’ottima scuola. Oggi il contract è molto di più: è personalizzazione, capacità di declinare un concept in una serie completa di prodotti, cura del dettaglio, robustezza. Il lungo elenco di realizzazioni di Billiani racconta tutto questo, nei contesti più diversi in tutto il mondo, dai bistrot ai ristoranti, dagli hotel agli spazi di lavoro, con uno stile che rimane sempre riconoscibile pur essendo progettato ogni volta ad hoc.

Production

Production flexibility and speed of response are the first characteristics demanded by the contract sector, and in this sense, the years of the great international orders have been an excellent school for Billiani. Today the contract market is much more: it is customisation, ability to run a concept through a complete series of products, attention to detail, robustness. Billiani’s long list of creations tells all this, in the most diverse contexts around the world, from bistros to restaurants, from hotels to workspaces, always with a style that remains recognisable despite being individually designed each time.

Cristina Celestino, Marco Ferreri, Emilio Nanni, Werther Toffoloni, Victor Carrasco, Francesco Faccin, Fabrizio Gallinaro, Michael Geldmacher, Harri Koskinen, Paul Loebach, Egidio Panzera, Timo Ripatti, Studiocharlie, Studioventotto, Kazuhide Takahama.

Cristina Celestino

Nasce a Pordenone nel 1980. Nel 2005, dopo aver concluso il percorso universitario alla facoltà di Architettura IUAV di Venezia, collabora con prestigiosi studi di progettazione e dedica la sua attenzione all’architettura d’interni e al design. Nel 2010 si trasferisce a Milano, dove fonda il suo studio e il brand Attico Design. Onorata con numerosi riconoscimenti a livello internazionale, nel 2019 Billiani le affida la direzione artistica dell'azienda, per raccontare un nuovo capitolo in continuità con la storia, i materiali e le lavorazioni tipiche del territorio.

Born in Pordenone in 1980, she graduated in Architecture from IUAV Venice University. In 2005 she started to collaborate with prestigious design studios, focusing on interior and product design. In 2010 she

moved to Milan, where she founded her studio and her brand Attico Design. She has received numerous awards and international recognition. With the aim of starting a new entrepreneurial chapter, in continuity with its history, materials and processes typical of the local territory, in 2019 Billiani entrusted Celestino with the artistic direction of the company.

Werther Toffoloni

Nasce a Udine nel 1930 e studia a Venezia. Insegna progettazione industriale e collabora da subito con varie industrie per il design e la consulenza artistica. È una matita feconda e, senza dubbio, uno dei protagonisti del design industriale italiano. Creatività, conoscenza dei materiali e grande attenzione alla funzionalità caratterizzano tutto il suo pregevole lavoro. Muore nel 2017, a 86 anni.

Werther Toffoloni was born in Udine in 1930. After having studied in Venice, he taught industrial design and quickly started working in various design sectors and as an artistic consultant. He was quite prolific and undoubtedly a major player in Italian industrial design. Creativity, a thorough knowledge of materials, and a great eye for functionality were the hallmarks of his corpus of work. He died in 2017, at the age of 86.

Victor Carrasco

Nato a Valencia, in Spagna, nel 1974, Victor Carrasco si laurea con lode in Ingegneria e disegno industriale presso il Politecnico di Valencia. Si allontana dalle tendenze e le mode passeggiere per dedicarsi allo sviluppo e al posizionamento di brand internazionali, grazie all’attenta sensibilità verso i trend futuri e alla passione per la sintesi e per la crescita sostenibile. Carrasco è direttore strategico di Viccarbe e, nel frattempo, collabora con molte aziende note a livello internazionale in qualità di designer industriale. Gli vengono conferiti i premi Prince

Felipe for Business Excellence e German Design Award.

Born in Valencia (Spain) in 1974, Victor Carrasco began his professional career after graduating Cum Laude in Industrial Design Engineering at the Polytechnic University of Valencia. Shying away from trends and fads, he has developed and positioned international brands with remarkable added value, thanks to his passion for synthesis, sustainable growth and his pragmatic vision of the future. Since 2007, he has been combining his position as strategic director of Viccarbe with that of industrial designer for numerous international companies. He was the recipient of the Prince Felipe Award for Business Excellence and the German Design Award.

BEYOND

Sokolski Dom, NUK, Plečnik House (Ljubljana)

Superare il confine per trovare le radici
e riscrivere ciascuno il proprio sapere.
Come Jože Plečnik con l'architettura, Billiani
con la sedia — a Lubiana, un secolo dopo.

Cross the border to find roots and
reconstruct each other's knowledge base.
Like Jože Plečnik with architecture, Billiani with
the chair — in Ljubljana, just a century later.

SOKOLSKI DOM

Primo complesso sportivo coperto della Slovenia, il Sokolski Dom risale agli anni Venti. Nella facciata, l'architetto Ivan Vurnik rilegge lo stile Art Déco alla luce della tradizione slovena, con elementi decorativi e geometrici. All'interno trovano posto una palestra con soffitto a volte e due atrii più piccoli.

› Slovenia's first covered sports complex, the Sokolski Dom dates back to the 1920s. On its facade, architect Ivan Vurnik reinterprets Art Deco style in the light of Slovenian tradition, with decorative and geometric elements. Inside there is a vaulted gym and two smaller atria.

p. 009 — 021

NUK (NARODNA IN UNIVERZITETNA KNJIŽNICA)

La biblioteca nazionale e universitaria è un edificio monumentale ispirato ai palazzi italiani e alla biblioteca Medicea Laurenziana di Firenze. Nel progettare il palazzo della conoscenza slovena, negli anni Trenta, Jože Plečnik cercò spunti e risposte nell'antico per creare un'estetica nuova, non ripiegata sulla tradizione.

› The national and university library is a monumental building inspired by Italian architecture and the Medicean Laurenziana library in Florence. In designing this Slovenian palace of knowledge in the 1930s, Jože Plečnik sought ideas and answers in the ancient world to create a new aesthetic, not focused on tradition.

p. 022 — 041

PLEČNIK HOUSE

“Una torre e un giardino”: è così che Jože Plečnik immaginava la sua casa prima di sapere che, dopo aver vissuto a Vienna e Praga, nel 1921 sarebbe tornato per sempre nella sua città. La casa dell'architetto è ancora come allora, un luogo intimo che raccoglie i frammenti della sua poetica e il desiderio di ritrovare le radici primarie di un'identità.

Frisée è una collezione che associa alla solidità del legno una frivolezza ironica e gioiosa. Il segno morbido e avvolgente di Cristina Celestino esalta la materia e il saper fare di Billiani con colori puri, angoli che si trasformano in curve delicate e gambe che terminano a cipolla. Benché pensata per il contract, Frisée esprime una leggerezza colta e sofisticata che guarda al mondo dell'ebanisteria.

Frisée is a collection that combines the solidity of wood with an ironic and joyful frivolity. Cristina Celestino's soft and enveloping touch exalts Billiani's materials and know-how with pure colours, corners that turn into delicate curves and bulb-end legs. Although designed for the contract market, Frisée expresses a cultured and sophisticated lightness that gives a nod to the world of cabinet making.

Nella sedia in legno Doll, primo progetto di Emilio Nanni per Billiani, l'essenzialità si esprime con garbo e morbidezza. Merito della sagomatura che fa apparire le gambe più sottili e dei tressi curvati, che alleggeriscono il sedile senza compromettere solidità e comfort. Evolutasi nel tempo in una collezione completa che comprende anche sgabelli, poltroncine, poltrone, tavoli e tavolini, Doll è una sedia camaleontica, capace di cambiare stile al cambiare del contesto grazie alla palette di colori e alla varietà di tessuti disponibili per la versione tappezzata.

The wooden Doll chair, Emilio Nanni's first commissioned design for Billiani, expresses essentiality with grace and softness. This is the result of its slender tapering legs and its curved tresses, which lighten the seat without compromising solidity or comfort. Evolved over time into a complete collection that also includes barstools, arm and lounge chairs, coffee and dining tables, Doll is a real chameleon of a chair, capable of changing style according to any changing context, thanks to the wide range of colourways and upholstery options.

Doll Frassino / Doll Ash

Emilio Nanni rilegge la sedia Doll dieci anni dopo. Nasce così la versione in frassino, caratterizzata dalla crociera. Ancora più sottili sedile e schienale, alleggeriti negli spessori.

Emilio Nanni revisits the Doll chair ten years later. Thus was born the ash version, characterized by its crosspiece. Even thinner seat and back, with reduced thickness.

Michael Geldmacher describe Layer come una seduta che sembra esistere da sempre pur essendo nuova – il risultato semplice di un lavoro complesso in cui estetica e capacità costruttiva si compenetrano. Sulle gambe in legno di frassino, che si aprono a compasso, s'innesta una struttura in multistrato che incorpora bracciolo e schienale imbottito, dove disegno e materia sono in continuità. Pensata come poltroncina, Layer si è poi evoluta nelle versioni lounge e sgabello.

Michael Geldmacher describes Layer as an armchair that seems to have existed for ever despite being new – the simple result of a complex work in which aesthetics and constructive capacity intertwine. On the splayed ashwood legs sits a plywood frame that incorporates the padded armrest and back, where design and material are in sync. Designed as an armchair, Layer then evolved to include the lounge and barstool versions.

Creare una seduta al contempo amichevole ed essenziale. Questa l'idea di Victor Carrasco, che per addolcire il tradizionale minimalismo nordico lavora sugli spessori della scocca in multistrato creando un unicum nella collezione Billiani. Da designer curioso a sua volta alla guida di un'azienda produttrice di sedie, Carrasco immagina una grande varietà di fusti e schienali, invitando architetti e progettisti a partecipare alla fase di design di prodotto – in un processo di co-creazione che ha nell'apertura e nella creatività il suo punto di forza.

Creating a chair that is both friendly and essential. This is the idea of Victor Carrasco, who, to soften the traditional Nordic minimalism, has worked on the thickness of the plywood shell to create a one-off within the Billiani collection. As an inquisitive designer who is also at the helm of a chair manufacturing company, Carrasco imagines a large variety of bases, inviting architects and designers to participate in the product design phase – in a co-creation process that has openness and creativity as its strong points.

Victor Carrasco esplora la fortunata tipologia della serie monoscocca e con Fitt Hug espande il concept della seduta Fitt. In questa nuova interpretazione, la scocca fasciante ha linee nette e decise. Sempre essenziale, si abbina in modo versatile a basi diverse – dalle classiche gambe in legno al fusto girevole – così da adeguarsi a qualsiasi contesto.

Victor Carrasco explores the successful single-shell style of seating, and with Fitt Hug he broadens the concept of the Fitt chair. In this new interpretation, the wrap-around body has clear and decisive lines. Always essential, it combines in a versatile way with different bases – from classically wooden legs to the revolving frame – so as to adapt to any setting.

È ispirata al design nordico degli anni Sessanta la sedia White, in cui si riconosce tanto l'estetica forte e senza compromessi del suo designer, Harri Koskinen, quanto l'eredità della sedia Green di Billiani, cui somiglia anche nel nome. Entrambe hanno forme generose e gambe spesse quattro centimetri, ma White è ancora più robusta: una sedia dalla presenza rassicurante, per tutti i contesti dove solidità e comodità sono imprescindibili.

The White chair is inspired by sixties Nordic design, in addition to acknowledging both the strong and uncompromising aesthetics of its designer, Harri Koskinen, as well as the legacy of Billiani's Green chair, which it also resembles through the choice of name. Both have generous shapes and four-centimetre thick legs, but White is even more robust: a chair with a reassuring presence, for all contexts where sturdiness and comfort are essential.

Per l'inedita combinazione tra legno e cuoio, Marimba è una novità nella collezione Billiani. Particolare la svasatura del sedile, così come la gamba posteriore, che si allunga e s'inclina leggermente per sostenere lo schienale in cuoio sagomato. Un progetto di Emilio Nanni che ha il carattere di un prodotto di pelletteria e il fascino di un oggetto artigianale. È disponibile anche una versione in feltro.

For the unprecedented combination of wood and leather, Marimba is a novelty in the Billiani collection. Particularly the shaping of the seat, as well as the back legs, which stretch and tilt slightly to support the shaped leather backrest. A project by Emilio Nanni that has the character of something you might find in a leather goods store, combined with the charm of a hand-crafted object. A felt version is also available.

Cat. Sedie, chairs
Poltroncine, armchairs

Fratina è ispirata alle classiche sedie con sedile in paglia palustre. Nella reinterpretazione di Emilio Nanni, che ne esagera le linee, le gambe hanno sezione tonda e lo schienale, agganciato alle gambe posteriori, è generoso al punto da diventare un semicerchio nella versione poltroncina. Il sedile è disponibile in tessuto, cuoietto, cinghie o cordino di cellulosa intrecciato, che simula l'antica lavorazione della paglia di palude. Insignita del Red Dot Design Award nel 2016, Fratina è la quintessenza di Billiani – una sedia in equilibrio perfetto fra tradizione e sperimentazione.

Fratina is inspired by those classic chairs with rush seats. In Emilio Nanni's reinterpretation, the designer exaggerates its lines, the legs have a round section and the backrest, attached to the rear legs, is generous to the point of becoming a semicircle in the armchair version. The seat is available in fabric, leather, straps or woven cellulose cord, which simulates the ancient processing of rush wickerwork. Awarded the Red Dot Design Award in 2016, Fratina is quintessentially Billiani – a chair in perfect balance between tradition and experimentation.

Nella sedia Blazer di Emilio Nanni l'estetica è definita dalle caratteristiche costruttive. Il tresso anteriore leggermente rientrante, il sedile sollevato e le gambe sfilate traducono un'idea di leggerezza ed eleganza, mentre i braccioli della poltroncina e l'imbottitura accrescono il comfort della seduta.

In the Blazer chair by Emilio Nanni, aesthetics are defined by its construction features. The slightly recessed front beam, the raised seat and the tapered legs translate an idea of lightness and elegance, while the armchair and upholstered versions make for extra comfort.

Tra i tanti dipinti di Vincent van Gogh ce n'è più di qualcuno che raffigura sedie. Sedie semplici, solide, tradizionali, di quelle che un secolo fa si potevano trovare dentro ogni casa di campagna. A queste s'ispira Vincent v. G., collezione disegnata da Werther Toffoloni che fa dialogare antico e moderno, solidità e leggerezza, arte e design.

Amongst Vincent van Gogh's various paintings, there are a number that feature chairs. Simple, solid, traditional chairs of type that, more than a century ago, could be found in every country house. The Vincent v. G. is inspired by these, a collection designed by Werther Toffoloni that brings together ancient and modern, solidity and lightness, art and design.

Werther Toffoloni ha disegnato Gradisca in occasione della personale che gli è stata dedicata dalla Galleria d'arte contemporanea Luigi Spazzapan di Gradisca d'Isonzo, tributo alla sua lunga carriera. È una collezione che sintetizza i valori tradizionali del distretto, produttività e concretezza, attraverso linee vivaci e nuove tecniche di produzione. Un esempio di come la sedia made in Friuli possa trasformarsi in un oggetto universale.

Werther Toffoloni designed Gradisca on the occasion of the tribute dedicated to him by the Luigi Spazzapan contemporary art gallery in Gradisca d'Isonzo, commemorating his long career. It is a collection that summarizes the traditional values of the district, productivity and concreteness, through lively lines and new production techniques. Another example of how the "Made in Friuli" chair can be transformed into a universal object.

Cat. Poltroncine, armchairs

Marco Ferreri reinterpreta un'icona del design scandinavo, la classica seduta a pozzetto, e crea una sedia di grande semplicità costruttiva dal segno elegante. E se la forma è d'ispirazione nordica, la tecnica ricalca la tradizione di Billiani, con tagli di raccordo in evidenza, base tornita e spessori maggiorati. Lo schienale curvo, che si allunga a formare i braccioli, conferisce a Nordica una personalità ben precisa, accogliendo chi si siede con il giusto comfort.

Marco Ferreri reinterprets an icon of Scandinavian design, the classic cockpit seat, and creates a chair of great constructive simplicity with a touch of elegance. And if the shape is Nordic-inspired, the technique follows the Billiani tradition, with visible fillet cuts, turned base and increased thicknesses. The curved backrest, which extends to form the armrests, gives Nordica a very specific personality, welcoming those who sit in it with just the right comfort.

La corrispondenza tra forma e funzione è uno degli assiomi su cui si basa la ricerca di Emilio Nanni e in questo senso Load è l'oggetto ideale, una sedia ridotta ai minimi termini. E proprio dall'essenzialità si sviluppa la creatività, tipologica ed estetica. Il risultato è una collezione che oltre alla sedia include poltrona e sgabello – anche nelle varianti con schienale in cima nautica intrecciata, una lavorazione ispirata al territorio di Billiani che, al confine tra collina e pianura, non è lontano dal mare.

The correspondence between form and function is one of the axioms on which Emilio Nanni's research is based and in this sense Load is just the ticket, a chair reduced to minimums. And from this very essentiality is developed typological and aesthetic creativity. The result is a collection that, in addition to the side chairs, includes lounge chairs as well as barstools – also in the variants with the upper back in nautical rope, craftsmanship inspired by the Billiani territory which, on the border between the hills and the plains, lies not very far from the sea.

Cat. Sedie, chairs

Non tutte le sedie nascono impilabili: lo diventano quando sono delle dimensioni giuste per essere sovrapposte e abbastanza leggere per essere sollevate. Take è una sedia progettata per unire la bellezza e la solidità del legno all'impilabilità. Una caratteristica che la rende ideale nei luoghi del contract e ovunque sia necessario aggiungere o togliere sedute facilmente e senza rinunciare all'ordine.

Not all chairs are born stackable: they become stackable when they are the right size to be stacked and light enough to be lifted. Take is a chair designed to combine the beauty and solidity of wood with stackability. This feature makes it ideal in contract locations and wherever it is necessary to add or remove seats easily and without untidiness.

Quando Gabriele Rigamonti, Carla Scorda e Vittorio Turla di Studiocharlie presentano a Billiani la sedia in legno che hanno disegnato, il prototipo è color rosso arancio e il suo nome è Aragosta, per via della seduta imponente e delle gambe sottili. Inizia così il sodalizio fra i designer di formazione brianzola e il know-how del distretto friulano. La sedia, così come la poltrona, è frutto di espedienti tecnici di grande sapienza come il sedile affinato in punta e lo schienale sottile e leggermente inclinato, che suggeriscono vivacità e dinamismo. Le gambe, perpendicolari al terreno, sono lavorate in modo tale da non sembrare chiudersi su se stesse come accadrebbe se fossero semplicemente dritte: una correzione ottica ispirata dalla tipografia, grande passione di Studiocharlie.

When Gabriele Rigamonti, Carla Scorda and Vittorio Turla of Studiocharlie presented the wooden chair they had designed to Billiani, the prototype was orangey red and its name was Aragosta, the Italian for lobster, due to the imposing seat and tapering legs. Thus began the partnership between these Brianza-trained designers and the know-how of the Friuli district. The Aragosta chair, as well as the armchair, are the result of highly skilled technical procedures such as the seat being refined at the front and the thin and slightly tilted backrest, suggesting liveliness and dynamism. The legs, upright on the ground, are worked in such a way that they do not seem to close on themselves as they would if they were simply straight: an optical correction inspired by typography, a great passion of Studiocharlie.

Toccata & Fuga sono una sedia e una poltroncina con gambe, schienale e braccioli torniti, un esercizio di stile progettato da Paul Loebach e realizzato da Billiani. Due gli spunti di partenza: da un lato la storia del design e le classiche sedie con gambe tornite, dall'altro la tecnologia delle macchine multi-asse a controllo numerico. L'esito è una collezione dal fascino antico e dallo spirito contemporaneo.

Toccata & Fuga are a chair and armchair with turned legs, backs and armrests, an exercise in style designed by Paul Loebach and created by Billiani. Two starting points: on the one hand the history of design and classic chairs with turned legs; on the other the technology of numerical control multi-axis machines. The result is a collection with ancient charm and a contemporary spirit.

Fabrizio Gallinaro reinterpreta la classica sedia Windsor adattandola allo spirito contemporaneo di Billiani. Nasce così W., che già dal nome dichiara il processo di riduzione e sottrazione di cui è il risultato. Nata in Inghilterra alla fine del Settecento e divenuta popolare in America, la Windsor è una delle tipologie di sedia più prolifiche della storia del design. È caratterizzata dall'inconfondibile schienale con elemento orizzontale curvo e listelli che si innestano nella seduta. È proprio su questi elementi, e più in generale su tutti gli elementi che compongono la sedia, che ha lavorato Gallinaro, riducendo al limite il materiale e riprogettando le inclinazioni e i rapporti tra le parti. Classico contemporaneo, W. è declinata in una serie di varianti tra cui la rocking chair, prima sedia a dondolo realizzata da Billiani.

Fabrizio Gallinaro reinterpreted the classic Windsor chair, adapting it to the contemporary spirit of Billiani. So was born W., which, right from the choice of name, declares the process of reduction and subtraction of which it is the result. Originating in England in the late eighteenth century and subsequently popular in America, the Windsor is one of the most prolific types of chair in the history of design. It is characterised by its unmistakable backrest with curved horizontal element and spindles that fit into the seat. It is precisely on these elements, and also more generally on all the elements that make up the chair, that Gallinaro worked, reducing the material to a minimum and redesigning the angles and ratios between the parts. Classically contemporary, W. comes in a series of variants including rocking chair, the first ever rocking chair made by Billiani.

Fedele alla materia legno, la collezione Drum si riconosce per la qualità delle lavorazioni che caratterizzano sedia, lounge, sgabelli in tre altezze e tavoli di diversi formati. Particolare la svasatura del sedile – spesso ma rastremato, come il piano del tavolo. Nelle sedie e nello sgabello con schienale, le gambe posteriori si allungano a sostenere la spalliera in multistrato curvato, sfinandosi e inclinandosi leggermente. La sedia in legno si riconferma un classico che ha ancora molto da dire.

Faithful to wood itself, the Drum collection stands out for the quality of the processes that characterize the side and lounge chairs and the stools in three heights, as well as tables of different sizes. The flaring of the seat is especially striking – thick yet tapered, like the table top. In the chairs and in the barstool with backrest, the rear legs lengthen to support the curved plywood backrest, tapering and tilting slightly. The wooden side chair remains a classic that still has a great deal to say.

Cat. Sedie, chairs

Francesco Faccin è un designer che ama il legno e il lavoro artigianale. Con Billiani si è dunque creata la connessione perfetta e Green ne è il risultato. Punto di partenza è il design nordico degli anni Trenta, riletto però nelle proporzioni. Il profilo, solido eppure essenziale, integra gli elementi strutturali e lo schienale curvato è accogliente, così come la sagomatura del sedile. Le gambe, leggermente sovradimensionate rispetto al solito, sono alleggerite dal sedile sottile e leggermente sollevato.

Francesco Faccin is a designer who loves wood and craftsmanship. With Billiani, therefore, the perfect connection was created and Green is the result. The starting point is the Nordic design of the 1930s, but with tweaked proportions. The profile, solid yet essential, integrates the structural elements and the curved backrest is welcoming, as is the shape of the seat. The legs, slightly oversized compared to the norm, are lightened by the thin and slightly raised seat.

Foglia è, per molti aspetti, un archetipo. Non soltanto segna l'ingresso di Billiani nel mondo del design, premiata dal Catas per l'innovazione e subito selezionata per il Compasso d'Oro e il Red Dot Design Award, ma è anche la sedia per antonomasia, quella che disegnerebbe un bambino tracciando linee semplici e nette. Con Foglia Marco Ferreri esplora l'idea di leggerezza fino ad arrivare a una scocca in legno sottilissima, una superficie continua di un millimetro e mezzo adagiata su una struttura in massello. Solida eppure fluida, elegante e di carattere, questa sedia è diventata un'icona nel campo delle ultraleggere.

Foglia is, in many respects, an archetype. Not only does it mark Billiani's entry into the world of design, awarded by Catas for innovation and immediately selected for the Compasso d'Oro and the Red Dot Design Awards, but it is also the chair par excellence, what a child would trace by drawing simple and clean lines. In Foglia, Marco Ferreri explores the idea of lightness all the way until achieving a very thin wooden shell, a continuous surface of a millimetre and a half on a solid wood structure. Solid yet fluid, elegant and with character, this chair has become an icon and the model for many ultralights to follow.

Puccio s'ispira agli sgabelli da mungitura, sedute senza design né designer che per la loro funzionalità hanno superato senza cambiamenti il passare dei secoli. A partire da questo oggetto antico, che forse Bruno Munari avrebbe inserito tra quelli del famoso elenco "Compasso d'Oro a ignoti", Emilio Nanni crea una collezione di sgabelli, panche e tavoli pensati per arredare gli spazi più ristretti, come quelli di un marciapiede. Oltre alla versione in frassino, che esprime il calore del legno, la famiglia Puccio è disponibile anche in acciaio, più leggera, essenziale e sofisticata.

Puccio is inspired by milking stools, seats without design or designers which thanks to their functionality, have survived unchanged over centuries. Starting from this quaintly old-fashioned item, which Bruno Munari would perhaps have included among those of the famous list "Compasso d'Oro Unknowns", Emilio Nanni created a collection of stools, benches and tables designed to furnish the tightest spaces, such as on a pavement. In addition to the ash version, which expresses the warmth of wood, Puccio is also available in steel, lighter, essential and more sophisticated.

Sey rappresenta un felice sconfinamento di Billiani in un territorio ancora poco esplorato dall'azienda. Disegnata da Emilio Nanni, unisce a una struttura in acciaio con braccioli, leggera e minimale, una scocca tappezzata o intrecciata in cima nautica. Da rassicurante seduta per il contract, Sey diventa così anche il prodotto ideale per l'outdoor, cui s'ispira sia nei colori sia nei materiali.

Sey represents Billiani happily dipping its toe into an area still relatively unexplored by the company. Designed by Emilio Nanni, Sey combines a steel frame with armrests, light and minimal, with upholstery or nautical rope weave. From a reassuring contract chair, Sey thus also becomes the ideal product for outdoors, which inspires both its colours and materials.

Cristina Celestino disegna una collezione lounge dalle forme morbide e armoniose. I volumi tondeggianti sono alleggeriti dalla base in legno lavorato, cifra stilistica di Billiani. La linea ondulata si rifà all'universo della moda, il cui fascino è ben presente anche nella qualità del rivestimento, che trova la sua migliore espressione nell'abbinamento tra colori e texture diverse per struttura e cuscinatura.

Cristina Celestino designs a lounge collection with soft and harmonious shapes. The rounded volumes are lightened by the worked wood base, Billiani's stylistic code. The wavy line refers to the world of fashion, whose charm is also present in the quality of the coverings, which find their best expression in the combination of contrasting colours and textures to frame and cushioning.

Spy è una collezione ampia e completa di sedie, poltrone, tavoli e tavolini. Leitmotiv è il disegno della gamba, che si assottiglia in punta e si presenta leggermente svasata. Cifra stilistica delle sedute è invece la manifattura della scocca, che dà il suo meglio di spalle ripiegandosi ad accogliere le gambe posteriori. Quattro i modelli di poltrona disponibili, dalla poltroncina elegante alla bergère, accogliente e confortevole. Oltre alla base in legno, è disponibile anche la variante in acciaio, modellata sulla scocca imbottita.

Spy is an extensive and complete collection of chairs, lounge chairs, armchairs, tables and coffee tables. Its leitmotif is the design of the leg, which tapers and is slightly splayed. The stylistic feature is the design of the body, with its rounded shoulders folding back to receive the rear legs. Four Spy pieces are available, from the elegant dining chair to the welcoming and comfortable rounded bergère. In addition to the wooden base, a steel version is also available.

A tre anni dall'esordio con Croissant, Billiani ed Emilio Nanni si cimentano in una nuova seduta imbottita, con base in legno di faggio tornito o acciaio. Il saper fare artigianale si esprime qui nella lavorazione dell'imbottitura, dove le cuciture creano un gioco di volumi che rende la sedia visivamente accogliente. Confortevole, elegante come un abito di sartoria, Hippy si può personalizzare con tessuto proprio o scelto tra quelli della nuova selezione di Cristina Celestino.

Three years after their debut collaboration with Croissant, Billiani and Emilio Nanni undertook a new upholstered chair, with a choice of turned beechwood or a steel base. The craftsmanship is expressed here in the upholstery work, where the seams create a play of volumes that make the chair visually welcoming. Comfortable, and as elegant as a bespoke suit, Hippy can be customized with your own fabric or chosen from those of the new Cristina Celestino selection.

Billiani si apre al mondo dell'imbottito con una ricca collezione che include sedia, poltroncina, lounge, sgabello, divanetto, pouf, panca e tavolo. Elementi trasversali sono la crociera e le gambe tondeggianti, mentre poltroncina, lounge e divanetto sono accomunati dallo schienale curvo, a forma di croissant. Una collezione che risponde alle esigenze di quei luoghi che riuniscono in sé funzioni diverse ma sono alla ricerca di una continuità stilistica.

Billiani opened up to the world of upholstery with a rich collection that includes side, arm and lounge chairs, barstool, sofa, pouf, bench and table. Unifying elements are the cross and the rounded legs, while the armchair, lounge chair and sofa share a common curved back, in the shape of a croissant. A collection that meets the needs of those places that bring together different functions but are looking for stylistic continuity.

Cat. Tavoli, tables

L'idea per Grapevine viene dai tralci delle viti e dalla volontà di replicare la loro naturale torsione sul fusto dei tavoli. Le gambe, tutte uguali, sono poste al centro del tavolo e ruotate di 90° in successione. Ne deriva un disegno scultoreo di grande dinamismo, che appare diverso a seconda del punto di vista dell'osservatore. Pensata inizialmente in noce, un legno nodoso dal colore intenso, la base è stata poi declinata in faggio e in diverse varianti metalliche conquistando una versatilità che la rende adatta ai più diversi contesti – dagli ambienti più sofisticati all'outdoor.

The idea for Grapevine comes from vine branches and the desire to replicate their natural twist on a table base. The legs, all the same, are placed in the center of the table and rotated 90° in succession. The result is a sculptural design of great dynamism, which appears different according to the observer's point of view. Initially conceived in knotty walnut, with its intense colour, the base was then developed to include beech and in different metal finishes, achieving a versatility that makes it suitable for the most diverse contexts – from the most sophisticated to outdoor environments.

Cat. Tavoli, tables

Lilliput è una collezione di tavolini da caffè in legno massello di frassino nata da un dettaglio costruttivo. Tutto ruota attorno all'incastro a pettine delle gambe, che sorreggono un piano rotondo. A congiungere i due elementi sono due pomelli in frassino naturale, particolari estetici che svelano il sistema di tenuta e quello, elementare, di assemblaggio. E proprio la facilità di montaggio e smontaggio è ciò che rende questi tavolini versatili, comodi da spedire e rapidi da mettere in opera.

Lilliput is a collection of solid ashwood coffee tables born from a single design feature. Everything revolves around the comb joint of the legs, which support a round top. The two elements are joined by two knobs in natural ash, aesthetic details that reveal the sealing system and the basic assembly system. And the ease of assembly and disassembly is what makes these coffee tables versatile, easy to transport, and quick to install.

Cat. Appendiabiti, coat-stands

Omaggio al grande design italiano, Tango è un appendiabiti in frassino formato da sei elementi ritorti attorno a uno snodo centrale. Proprio la giuntura è stata lo spunto da cui è partito il designer finlandese Timo Ripatti, che seguendo i dettami del minimalismo scandinavo, ha puntato a non usare viti né raccordi di alcun tipo tra gli elementi, che sono fresati e semplicemente incastrati tra loro.

A tribute to great Italian design, Tango is an ashwood coat-stand made of six poles twisted around a central joint. The joint was the starting point for Finnish designer Timo Ripatti; he followed the dictates of Scandinavian minimalism, and aimed not to use screws or fittings of any kind between the poles, which are milled and simply fitted together.

Cat. Tavoli, tables

Kazuhide Takahama progettò il tavolino Marcel negli anni Settanta, usando solo tondino di metallo e vetro. Un oggetto semplicissimo che non ha subito il passare del tempo, e che oggi Billiani riedita, con l'aiuto degli eredi del maestro giapponese, in una più vasta gamma di formati e finiture.

Kazuhide Takahama designed the Marcel coffee table in the seventies, using only metal rod and glass. A very simple piece that has not suffered over time, and which today Billiani re-proposes, with the help of the heirs of the Japanese master, in a wider range of formats and finishes.

“Il design è una cosa seria”

«Design is a serious matter»

Werther Toffoloni

Nato nel 1930 a Udine, dove si è
spento nel 2017, si è dedicato per

più di cinquant'anni all'insegnamento
e alla progettazione industriale.

Werther Toffoloni è stato un grande creatore di sedie. Tra i primi industrial designer friulani, Toffoloni ha segnato la storia di molte realtà locali con la sua idea di design come “cosa seria, basata sulla correttezza del prodotto – cioè sulla comodità, sulla resistenza e sulla qualità della forma”.

Toffoloni individua nella tradizione il punto di forza di quello che tra gli anni Cinquanta e i Sessanta sta iniziando a imporsi come il triangolo della sedia. Non a caso tra le sue prime realizzazioni c'è il restyling della Marocca, la tipica sedia friulana con sedile impagliato, rivisitata prima di tutto per capire quale poteva essere il risultato di un'operazione del genere: reinterpretare un prodotto tradizionale “con un po' di attenzione al disegno”.

La capacità di far evolvere le forme tradizionali per renderle appetibili al mercato diventerà la cifra stilistica di Toffoloni, nonché il motivo per cui Billiani lo coinvolge a partire dal 2004 con la richiesta di creare per l'azienda, entrata da poco nell'universo del design, prodotti inediti ma rassicuranti. Sedie che con la loro serietà raccontano un pezzo di storia del distretto.

Born in 1930 in Udine, where he passed away in 2017, he dedicated himself to teaching and industrial design for more than fifty years.

Werther Toffoloni was a great chair maker. Among the first industrial designers from Friuli, Toffoloni was involved in the histories of many local manufacturers with his idea of design as “a serious matter, based on the correctness of the product – that is, on comfort, resistance and quality of form”.

Toffoloni identified in tradition the strength of what, through the fifties and sixties, was starting to establish itself as the chair triangle. It is no coincidence that among his first creations there was the restyling of the Marocca, the typical Friulian chair with straw seat, revisited, first of all, to understand what could be the result of such an operation: reinterpreting a traditional term “with a little attention to design”.

The ability to evolve traditional shapes to make them attractive to the market would become Toffoloni's stylistic code, as well as the reason why Billiani commissioned him from 2004 with the brief to create for the company, recently arrived in the universe of design, fresh but reassuring products. Chairs that with their seriousness tell a piece of local history.

and colour.

Bolognese classe 1955, nella sua carriera ha ricevuto menzioni, premi e riconoscimenti.

Il più recente è il Red Dot-Design Award per la sedia Fratina di Billiani.

Emilio Nanni è il nome che ricorre più spesso nel catalogo di Billiani. Architetto, designer e artista, Nanni è un prolifico disegnatore di sedie: nella sua carriera ne ha disegnate a decine, “per una sorta di sfida alla citazione di Mies van der Rohe, che diceva che è molto più difficile disegnare una sedia che progettare un grattacielo”.

Disegnare una sedia significa intraprendere un progetto che concentra in sé molti elementi, dal rapporto con i propri modelli di riferimento (che nel caso di Nanni sono i maestri del Movimento Moderno) al ruolo del mercato. Nelle sedie disegnate per Billiani, il filo conduttore è il senso di compiutezza dato dalla proporzione perfetta, ottenuta attraverso il dimensionamento d'insieme, il confronto con il legno, la capacità di evidenziare la qualità della lavorazione, la definizione del dettaglio e delle finenze costruttive. Pur essenziali, le sedie di Nanni riescono così a trasmettere garbo e morbidezza, dando l'impressione di esistere da sempre.

Emilio Nanni

Bolognese born in 1955, in his career received mentions, prizes and awards.

The most recent is Red Dot Design Award for Billiani's Fratina chair.

Emilio Nanni is the name that crops up most often in the Billiani catalogue. Architect, designer and artist, Nanni is a prolific designer of chairs: during his career, he has designed dozens of them, “for a sort of challenge to the quote by Mies van der Rohe, who said that it is much more difficult to design a chair than to design a skyscraper”.

Designing a chair means undertaking a project that concentrates many elements, from the relationship with its reference models (which in the case of Nanni are the masters of the Modern Movement) to market influences. In his chairs designed for Billiani, the common thread is the sense of completeness given by perfect proportioning, obtained through the overall sizing, the comparison with the wood, the ability to highlight the quality of the workmanship, the definition of the detail and the construction refinements. Although essential, Nanni's chairs thus manage to convey grace and softness, giving the impression of having always existed.

Cristina Celestino

Architetto e designer, Cristina Celestino è nata a Pordenone nel 1980, vive e lavora a Milano.

Il suo lavoro spazia dalla direzione artistica alla progettazione di interni e prodotto.

Cristina Celestino è una designer dal tocco delicato e dallo sguardo terso e contemporaneo, cui si unisce una conoscenza enciclopedica del design italiano.

Fin dai tempi degli studi in architettura a Venezia è attratta dagli interni disegnati dai grandi protagonisti del Novecento dove il lavoro dell'architetto si amplia fino ad accogliere gli arredi e i più piccoli dettagli.

L'adorazione per il design inizia così e prende prima la forma del collezionismo, poi quella della progettazione, che spazia dagli interni ai prodotti che li arredano.

Tra sensibilità architettonica e innovazione formale, il risultato è un design colto che intreccia “la conoscenza data dallo studio dell'architettura, il gusto per il bello che viene dal collezionismo, una visione emozionale ed evocativa del prodotto accompagnata dalla costante ricerca di una componente innovativa”. È questo modo di esprimersi unico e personale, anche attraverso un inedito uso di materiali tradizionali e scelte cromatiche coraggiose, che ha spinto Billiani ad affidarle nel 2019 la direzione artistica dell'azienda.

Cristina Celestino was born in Pordenone in 1980. Architect and designer, she lives and works in

Milan. Her activity ranges from artistic direction to interior and product design.

Cristina Celestino is a designer with a delicate touch and a clear and ironic look, which combine with an encyclopedic knowledge of twentieth century Italian design. Ever since she was an architecture student in Venice, she has been attracted by the interiors designed by the twentieth century greats where the architect's work expands to encompass furnishings and the smallest of details.

The love of design begins in this way and first takes the form of collecting, then that of design, ranging from interiors to products. The result of this architectural awareness and formal innovation is a cultured design that intertwines "the knowledge that comes from the study of architecture, the taste for beauty that comes from collecting, an emotional and evocative vision of the product, and the search for an innovative component".

It is this unique and personal way of expressing herself, which emerges also from the unprecedented use of traditional materials and bold colour choices, that convinced Billiani to entrust Cristina Celestino in 2019 with the artistic direction of the company.

“Il design intreccia
la conoscenza, il
gusto per il bello, una
visione emozionale ed
evocativa del prodotto
accompagnata dalla
ricerca costante
di una componente
innovativa”

«Design intertwines knowledge, the taste for beauty,
an emotional and evocative vision of the product, and the
search for an innovative component»

Finiture

Finishes

Billiani è da sempre sinonimo di legno e colore. E se legno vuol dire frassino, faggio, rovere e noce, il colore ha tre anime: quella ironica e fresca delle tinte forti, quella istituzionale e rigorosa dei toni classici, quella domestica e intima delle sfumature più eleganti. Di tutte e tre è espressione la collezione tessuti, che affianca texture basiche a trame più calde e sofisticate come il bouclé italiano.

Billiani has always been synonymous with wood and colour. And if wood means ash, beech, oak and walnut, colour has three souls: the ironic and fresh one of bold shades; the institutional and rigorous one of classic tones; the domestic and intimate one of the most elegant hues. The fabric collection is the expression of all three, combining basic textures with warmer and more sophisticated ones such as Italian bouclé.
