Umbrosa cannot be held responsible for any wind damage. Please consult our warranty policy on [www.umbrosa.com](http://www.umbrosa.com) for more information.

For more details and clarification on the beaufort scale, see last page of this document. Detailed explanations on the ideal wind position can be found on the general windscores document.

## SPECTRA

### Wind recommendations & tips

Tips for the ideal wind position:

For Spectra, we advise to position the umbrella in the direction of the wind (1), put the arm in a 10° angle (2) and put the umbrella on a flat surface. When closing the umbrella the strap and protection cover need to be correctly used. Failure in doing so can cause damage even in a closed position.
