Qbox Decor

All **Qbox steel** pergola models with ACS, AC1 and AC2 beams can be transformed into Qbox Decor by applying ornamental decors. Decor can be adapted more naturally to particular architectural contexts. Ornamental decors made up of beams, uprights and ridges can be applied to Qbox with a fixed cover such as Tenso, Giza, Linea, K Fisso, Polycarbonate, Bamboo, Fisso but also to Qbox with a movable bioclimatic cover such as K Retractable, Alx, Blue, Smart, Shade Plus, Shade Plus Retract or in textile membrane, such as K Retractable.

The beams have relief decorations along the perimeter giving elegance to the structure

Gazebo Airone New

The Airone New ornamental gazebo is much more than a simple structure: it is an elegant environment from which it is possible to admire the beauty of nature. Made with high quality materials and a refined design, the Airone New gazebo integrates perfectly into any type of garden, adding a classy touch that will not go unnoticed. Perfect for creating a romantic and welcoming atmosphere, it is ideal for outdoor summer evenings, dinners with friends or simply for a moment of peace and tranquility. The supporting structure of the Airone New gazebo is made of steel with a fireproof textile membrane covering. The ridges are made with steel spheres, a decorative element that enhances the structure. The Airone New gazebo is an essential, resistant, stable gazebo, entirely Made in Italy. The Airone New Gazebo requires little maintenance and can be installed easily and without permits. Customizable for size, color and print.

Decor 100

The **Giza, Tenso and Cicogna gazebo** models can be transformed into Decor 100 gazebos thanks to the application of ornamental friezes and decorations to facilitate the insertion of gazebos in special architectural contexts such as villas and historical gardens. The application of the Decor 100 beam allows structures with minimum dimensions of 300 x 300 cm and maximum dimensions of 700 x 700 cm to be set up.

Decor 150 P

The **Giza and Cicogna gazebo** models can be transformed into Decor 150 P gazebos thanks to the application of ornamental friezes and decorations. The peculiarity of the Decor 150 P gazebo line is the size, in fact, thanks to the Decor 150 P beam, it is possible to start from a minimum size of 700 x 700 cm up to a maximum of 1000 x 1000 cm.

The Decor 150 P gazebos can be used to cover large spaces in historical contexts such as villas and gardens.

Gazebo Liberty

Liberty Decor In and Out gazebos represent the classic ornamental gazebo. Liberty Decor gazebos are garden structures that combine functionality and aesthetics, becoming a central element in outdoor spaces such as gardens, parks or courtyards. The ornamental gazebo is much more than a simple cover: it is an architectural element that gives the garden a touch of elegance and refinement, as well as creating a convivial space in which to relax in contact with nature.

Pensilina Decor

Pensilina Decor recalls with elegance and refinement the style of the ornamentals projecting roofs from the Liberty era. The friezes and decorative elements make the Décor projecting roof an outdoor solution refined, ideal for living historic buildings, gardens and terraces.

The **Pensilina Decor** projecting roof is made of steel and features a thoughtful sloping roof to ensure flow immediate rainwater, thanks also to the gutter integrated with ducting of exhaust inside the uprights.

Pensilina Decor is not just a tribute to the famous one architecture of the past, but an outdoor solution functional and modern, which combines decorative elements and practicality in one element architectural value

Colori e finiture

The insertion of pergolas and gazebos in historical architectural contexts, such as villas and gardens, requires special attention to visual and environmental balance.

One of the key elements in ensuring harmony within the landscape context is the conscious use of colour.

When designing a new structure in these contexts, the primary objective should be to minimise visual impact. Neutral and natural colours, such as earthy tones, greens and greys, are often preferable because they blend in with their surroundings, recalling traditional materials and natural textures. **These colours** not only reduce the visual contrast, but **also allow the structure to dialogue with the existing architecture**, avoiding creating an aesthetic break.

COLORI STRUTTURE PORTANTI

To reflect the refinement of the natural materials surrounded by vegetation, we have chosen the following colours capable of camouflaging the modern intervention and at the same time enhancing the unique features of the context.
