

CUPRUM

Introducing Cuprum, our luxury planter collection designed by Jan Buelens. With technical expertise and a passion for design and plants, Jan's innovative approach to blending materials and shapes has resulted in a stunning collection. Each detail is the fruit of his creative energy, making these planters true works of art. Browse our catalogue to discover the perfect Cuprum planter to elevate your space.

HANDCRAFTED

At our manufacturing facility in Europe, our team of skilled artisans handcraft each and every one of our planters to meet the highest standards of quality in both techniques and materials. The result is a truly unique object that is perfect for enhancing private residences or public spaces. Thanks to our innovative, lightweight design, our planters are ideal for use on terraces and as indoor decorations, ensuring versatility in any setting.

BRASS ROUND PLANTER

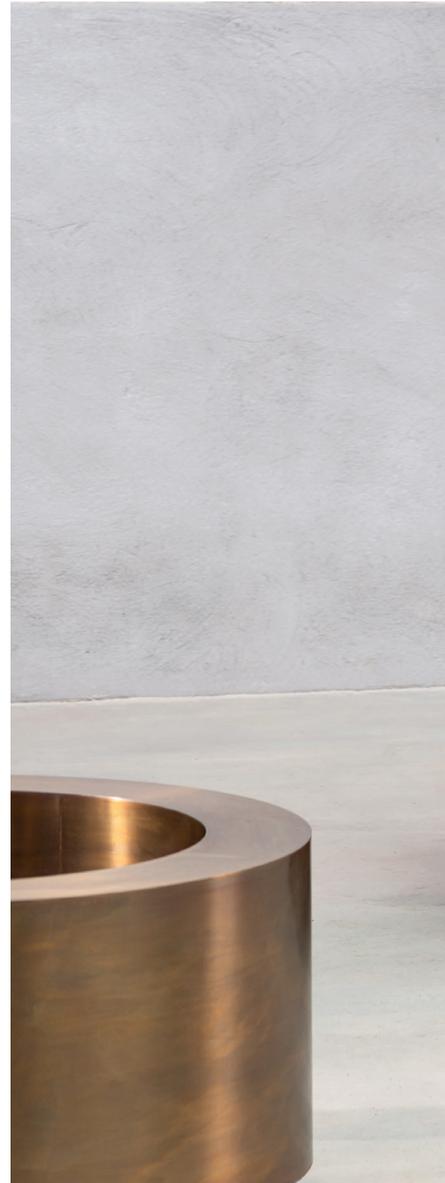

Our Brass Round Planter is available in sizes up to two meters in width, with larger models designed to be easily handled by a forklift. Featuring our innovative lightweight design, Cuprum planters are perfect for enhancing terraces and indoor spaces. For indoor use, it's important to ensure that the stainless steel drainage is closed, while for outdoor use, it should be left open. Choose the Brass Round Planter to add a touch of sophistication and elegance to any indoor or outdoor environment.

BRASS CUBE PLANTER

Our Brass Cube Planter is expertly crafted to meet our exacting standards for quality, design, and functionality. Available in four sizes—70cm, 90cm, 110cm, and 140cm (which can be handled by a forklift)—this square-shaped planter is perfect for outdoor use or indoor decoration. The lightweight design allows for easy maneuverability, while the stainless steel drainage should be closed for indoor use and left open for outdoor use. Choose the Brass Cube Planter to elevate the aesthetic of any space, indoors or out.

POLYESTER ROUND PLANTER

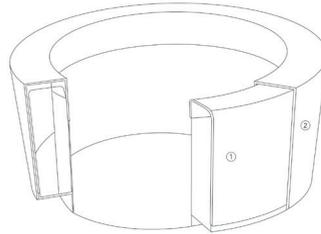

To ensure optimal color quality, our polyester planters undergo a mass-coloring process that renders them both color-fast and resistant to UV radiation. In addition to a range of sizes, we offer these planters in a diverse selection of RAL colors to meet the unique needs of your project. Our planters are also designed with a wide rim for superior insulation. For indoor use, it's important to ensure that the stainless steel drainage is closed, while for outdoor use, it should be left open.
