ACOUSTIC ARCHITECTURE

Gaber patented acoustic program was developed with the aim of combining acoustic improvement with the aesthetic of artistic designs.

[IT] I pannelli fonoassorbenti hanno la funzione di limitare il riverbero, all'interno degli ambienti confinati. Negli ambienti chiusi, il rumore complessivo percepito è maggiore della reale sorgente che lo ha generato poiché è incrementato dalle riflessioni prodotte dalle pareti, soprattutto se queste sono costituite da materiali lisci e compatti (riflettenti). La funzione dei pannelli fonoassorbenti è quindi quella di trasformare le superfici riflettenti in superfici acusticamente assorbenti.

[EN] Acoustic panels are designed to limit reverberation within confined environments. In enclosed spaces, the overall noise is greater than the source that generated it, increased from the reflections produced from walls, especially if these are made of smooth and compact materials (reflective). The function of the sound absorbing panels is therefore to transform the reflective surfaces in acoustically absorbent surfaces.

[FR] Les panneaux insonorisants ont pour fonction de limiter la réverbération à l'intérieur des lieux confinés. Dans les espaces fermés, le bruit perçu est supérieur à la source réelle qui l'a générée puisqu'il est amplifié par les réflexions produites par les murs et plafonds, surtout si ceux-ci sont fait d'un matériel lisse et compact (réfléchissant). La fonction des panneaux insonorisants est donc de transformer les surfaces réfléchissantes en surfaces absorbantes acoustiquement.

[ES] Los paneles acústicos están diseñados para limitar la reverberación dentro de ambientes confinados. En espacios cerrados, el ruido total percibido es mayor que la fuente real que las generó, con un incremento de las reflexiones producidas por las paredes y el techo, especialmente si estos están hechos de material liso y compacto (reflectante). Por lo tanto, la función de los paneles que absorben el sonido es transformar las superficies reflectantes en superficies acústicamente absorbentes.

QUALITY AND PERFORMANCE

Acoustic Comfort

[IT] La progettazione acustica aumenta la produttività, favorisce una sensazione di benessere e aiuta il recupero dallo stress quotidiano.

I prodotti Gaber consentono un notevole miglioramento dell'acustica in case private, uffici, alberghi, ristoranti, ospedali, scuole, ambienti relax e spazi pubblici, decorando gli edifici più moderni ed intervenendo a posteriori su quelli esistenti eliminando il riverbero in modo rapido e semplice non modificandone la struttura.

[EN] The goal is to help create a sustainable sound environment for more efficient work output and better breakout areas.

Gaber acoustic products ensure significantly improved acoustics in private homes as well as in offices, hotels, restaurants, hospitals, schools, breakout areas and public spaces; decorating modern buildings and already existing installations, quickly and easily removing reverberation without structural modifications.

[FR] Le design acoustique augmente la productivité, en favorisant une sensation de bien être tout en aidant la récupération liée au stress quotidien.

Les produits Gaber permettent une amélioration significative de l'acoustique dans les maisons, les bureaux, les hôtels, les restaurants, les hôpitaux, les écoles, les lieux de détente et les espaces publics tout en décorant les bâtiments les plus modernes et intervenant sur ceux existants en éliminant la réverbération rapidement et facilement sans changer la structure.

[ES] Reducir el ruido acústico mejora la productividad, promueve una sensación de bienestar y ayuda a la recuperación del estrés diario.

Los productos acústicos de Gaber permiten una mejora significativa de la acústica en los hogares, así como oficinas, hoteles, restaurantes, hospitales, escuelas, salas de relajación y espacios públicos; permiten la decoración de los edificios más modernos e intervenir con carácter retroactivo sobre los existentes, eliminando la reverberación fácil y rápidamente sin cambiar su estructura.

THE WEIGHT OF LIGHTNESS

Lightweight & Strong

[IT] Leggerezza ed essenzialità consentono un semplice fissaggio a parete o a soffitto dei sistemi acustici Gaber, con l'ausilio di un supporto brevettato nascosto; i pannelli possono essere posizionati orizzontalmente, verticalmente o diagonalmente, offrendo agli utenti la possibilità di creare disegni simmetrici o asimmetrici. Le tecnologie e i materiali utilizzati rendono i prodotti leggeri, maneggevoli, durevoli e resistenti agli impatti.

[FR] Légèreté et simplicité permettent une fixation facile sur les murs ou au plafond des systèmes acoustiques Gaber grâce à un support caché et breveté; les panneaux peuvent être placés horizontalement, verticalement ou en diagonale, offrant aux utilisateurs la possibilité de créer des dessins symétriques ou asymétriques. Les technologies et les matériaux utilisés font des produits légers, faciles à manipuler, durables et résistants aux chocs.

[EN] The lightness and simplicity of Gaber acoustic systems make for easy installation on walls and ceilings by using our hidden patented bracket, allowing the panels to be mounted either horizontally or vertically or even diagonally, offering users plenty of flexibility to create both symmetrical and asymmetrical patterns. The materials and technologies utilized result in lightweight and easy to handle products that are both durable and impact-resistant.

[ES] Ligereza y simplicidad permiten una fácil fijación a la pared o en el techo de los sistemas acústicos Gaber, utilizando nuestro apoyo oculto patentado, que permite a los paneles ser colocados en posición horizontal, vertical o diagonal, dando a los usuarios la libertad de elección para crear dibujos simétricos o asimétricos. Las tecnologías y los materiales utilizados se convierten en productos ligeros, fáciles de manejar y resistentes a los golpes.

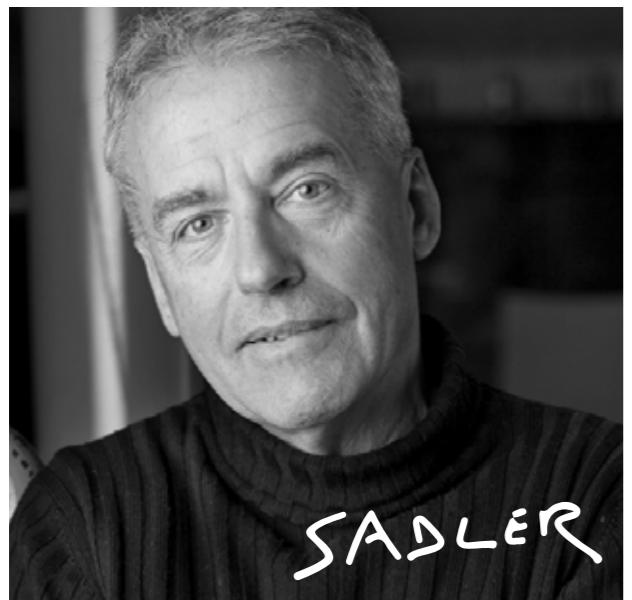

PATENTS

[IT] Le collezioni Gaber racchiudono molteplici brevetti, tecnici ed ornamentali, che derivano da una costante fase di ricerca e sviluppo, anche in collaborazione con università ed istituti di ricerca.

[EN] The Gaber collections contain multiple patents, both technical and design, which stem from constant research and development, even in partnership with universities and research institutes.

[FR] Les collections Gaber détiennent des brevets de fabrication, que ce soit au niveau technique mais aussi décoratif; ces brevets sont le fruit d'une recherche et d'un développement constant, en collaboration avec les instituts de recherche universitaires.

[ES] Las colecciones Gaber contienen multiples patentes, técnicas y decorativas, resultado de una fase constante de investigación en colaboración con universidades e institutos de investigación.

[IT] Forme, colori, grafiche e materiali dei sistemi acustici Gaber prendono forma in collaborazione con i più importanti designer, per arrivare alla piena soddisfazione delle esigenze progettuali, sia tecniche che decorative.

[FR] Les formes, les couleurs, le graphisme et les matériaux des systèmes acoustiques Gaber ont pris forme grâce à la collaboration avec d'importants designers, ce qui a permis d'adapter les produits aux demandes les plus exigeantes au niveau technique mais aussi décoratif.

[EN] Shapes, colours, graphics and materials for Gaber acoustic systems are conceived in partnership with leading designers, in order to ensure total satisfaction, both technical and decorative, on project requirements.

[ES] Formas, colores, gráficos y materiales de los sistemas acústicos de Gaber se concretan en colaboración con los diseñadores más importantes, para llegar a la plena satisfacción de los requisitos del proyecto, tanto técnicos como decorativos.

[IT] La superficie "perforata" dei rivestimenti consente alle onde sonore di penetrare nel centro del sistema (assorbimento); la sezione tridimensionale impedisce alle onde sonore di essere riflesse direttamente, evitando spiacevoli fenomeni di eco (diffusione).

[EN] The "perforated" surface of the textile covers allows sound waves to travel into the core (absorption). The three-dimensional section of the acoustic panels prevents the sound waves from bouncing straight back, avoiding unpleasant echo (diffusion).

[FR] La superficie "perforée" du revêtement permet aux ondes sonores de pénétrer à l'intérieur du panneau (absorption); la section 3D empêche aux ondes sonores d'être renvoyées directement, ce qui permet d'éviter le phénomène désagréable de l'écho (diffusion).

[ES] La superficie de recubrimiento "perforada" permite que las ondas sonoras penetren en el centro de el sistema (absorción); la sección tridimensional de los paneles impide a las ondas sonoras que se reflejen directamente, evitando fenómenos de eco (difusión).

PASSION TAKES FORM

Recyclable, sound absorbent, fire resistant, lightweight and durable materials.

2 Fabric Coverings

3 Technopolymer

[IT] Rivestimenti e finiture superficiali suscitano emozioni e sollecitano i sensi: che si tratti di decori, texture o forme. Ricerca, sperimentazione e tecnologia aiutano Gaber nella produzione di nuovi effetti tattili ed emozionali per le superfici destinate all'interior design.

[EN] Coverings and finishes stimulate and impact on the senses: they are decoration, textures and patterns. Research, technology and development assist Gaber in the production of new emotional tactile effects on surfaces intended for interior design.

[FR] Les revêtements et finitions des surfaces arrivent à susciter en nous émotions qu'il s'agissent du décor, des textures ou des motifs. La recherche, l'expérience et la technologie aident Gaber dans la production de nouveaux effets tactiles et émotionnels pour les zones design de l'intérieur.

[ES] Revestimientos y acabados superficiales evocan emociones y sentidos: en decoraciones, texturas o diseños. La investigación, la experimentación y la tecnología ayudan Gaber en la producción de nuevos efectos táctil y emocionales para las áreas de los decoradores.

Success in progress

[IT] Tutta la superficie dei sistemi acustici Gaber è utile ai fini della correzione e del miglioramento del benessere acustico degli ambienti. Si tratta di prodotti realizzati con un sistema industriale, ai vertici della categoria che, grazie alle alte prestazioni, riduce al minimo l'impatto volumetrico per integrarsi perfettamente in tutti i progetti. Gaber ha ottenuto importanti riconoscimenti a livello internazionale, grazie alle innovazioni tecnologiche, al design e all'originalità dei propri prodotti.

[EN] The entire surface of Gaber acoustic systems is useful for correcting and improving the acoustic performance in various environments. These products are made through cutting edge industrial processes, as a result of which, extraneous sounds are minimized, making these systems fit perfectly into all projects. Gaber has won multiple international design awards. These recognitions are a testament to Gaber's unstinting commitment to design and innovation.

[FR] Toute la surface des systèmes acoustiques Gaber est utile pour corriger et améliorer le bien-être acoustique des espaces. Il s'agit de produits réalisés avec un système industriel, au top de la catégorie qui, grâce à la haute performance, réduit au minimum l'impact volumétrique pour s'intégrer parfaitement dans tous les projets. Gaber a reçu de nombreux prix au niveau international, grâce à l'innovation technologique, au design et à l'originalité de ses produits.

[ES] Toda la superficie de los sistemas acústicos Gaber es útil para corregir y mejorar el bienestar acústico de los ambientes. Estos productos están hechos con un sistema industrial, en la cima de la categoría que, gracias al alto rendimiento, se reduce a el mínimo impacto volumétrico, para integrar perfectamente en todos los proyectos. Gaber ha sido ampliamente reconocida a nivel internacional, gracias a las innovaciones tecnológicas, diseño y originalidad de sus productos.

A QUIET REVOLUTION

[IT] I sistemi acustici Gaber sono stati testati in camera riverberante (semanecoica) secondo le norme UNI EN ISO 354 e UNI EN ISO 11654 per determinarne il coefficiente di assorbimento sonoro. I risultati dei test evidenziano le migliori capacità di miglioramento acustico in relazione al volume occupato, le misurazioni nelle diverse frequenze sono uno strumento indispensabile per i professionisti del settore.

[EN] Gaber acoustic systems have been tested in reverberation rooms (semanecoic) in accordance with UNI EN ISO 354 and UNI EN ISO 11654 standards, to determinate their sound absorption coefficient. Test results show the best acoustic improvement capacity in relation to the volume occupied, measurements at different frequencies are an indispensable tool for professionals.

[ES] Los gráficos muestran cómo los paneles acústicos mejoran la acústica de un lugar: absorben con eficacia las frecuencias media (de 500 á 2000Hz), típicas de la voz humana y de el ruido de fondo de los ambiente de trabajo.

[IT] I grafici dimostrano come i pannelli acustici migliorino l'acustica di un ambiente: assorbono efficacemente le medie frequenze (tra i 500 e i 2000 Hz), tipiche della voce umana e dei rumori di fondo di tutti gli ambienti lavorativi.

[EN] Graphics show how acoustic panels improve acoustic environments: they perfectly absorb the midrange frequencies (between 500 to 2000Hz), those typical of the human voice and general noise in all workplaces.

[FR] Les graphiques montrent comment les panneaux acoustiques améliorent l'acoustique d'une pièce: ils absorbent efficacement le milieu de gamme (entre 500 et 2000 Hz), typique de la voix humaine et le bruit de fond.

ENJOY THE SILENCE

Gaber acoustic systems do not require any particular maintenance, the lack of space between panels reduces dust build-up. All that is needed is simple vacuuming of the fabric parts and a normal cloth and warm water for polymer surfaces.

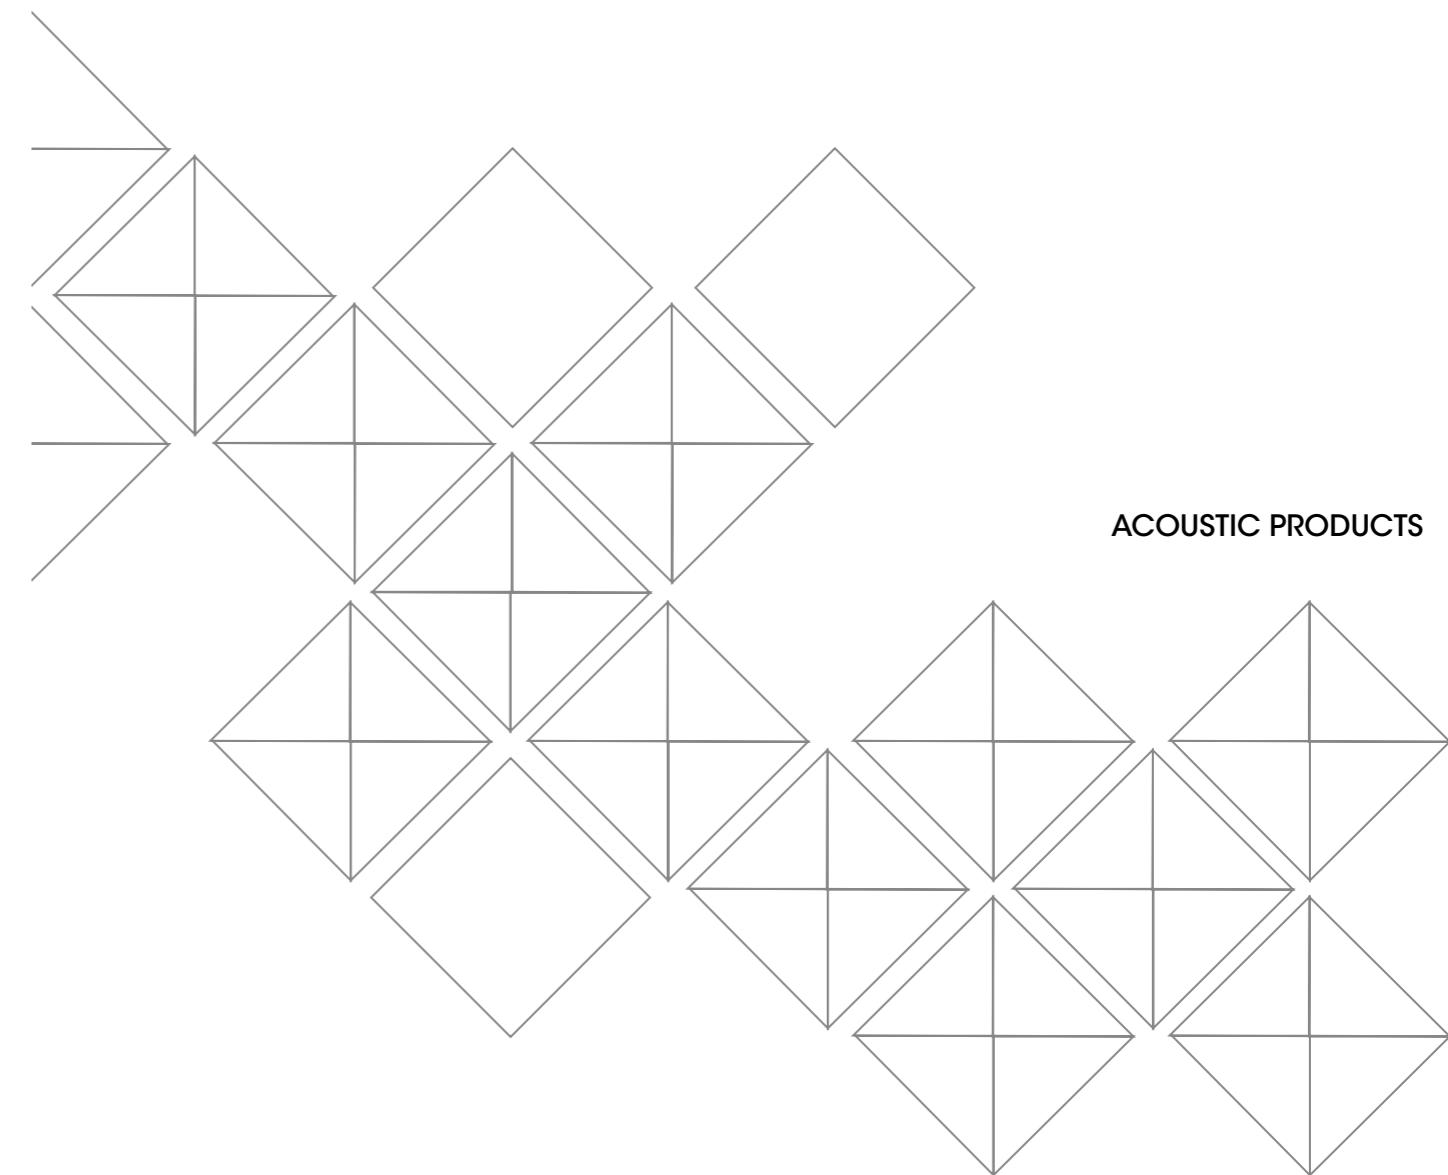

[IT] La posa risulta un'operazione molto rapida e, data la leggerezza dei prodotti, può essere eseguita da un solo operatore; l'estrema semplicità di fissaggio non richiede l'ausilio di personale esperto. I diversi sistemi di installazione accentuano la flessibilità dei prodotti e ne permettono l'impiego in ambienti pubblici e privati. I sistemi acustici Gaber non richiedono manutenzione post-montaggio, l'assenza di spazi tra un pannello e l'altro riduce l'accumulo di polvere, la pulizia avviene per aspirazione negli elementi di tessuto e con un panno umido sui bordi in plastica.

[EN] Thanks to the lightness of the products, installation is very quick and can be performed by one person and no specifically experienced fitters are necessary. The different installation systems show off the flexibility of the products and allow their use in public and private settings.

[FR] La pose est très rapide étant donné la légèreté des produits et peut être réalisée par un seul opérateur; l'extrême facilité de fixation ne nécessite pas l'aide d'un

personnel expérimenté. Les systèmes d'installation divers accentuent la flexibilité des produits et permettent l'utilisation dans des environnements publics et privés. Les systèmes acoustiques Gaber ne nécessitent pas un entretien particulier. Le manque d'espaces entre un panneau et l'autre réduit l'accumulation de poussière, le nettoyage se fait par aspiration pour les éléments en tissu et avec un chiffon humide pour les bords en plastique.

[ES] La instalación es muy rápida y, dada la ligereza de los productos, se puede realizar por un solo operador; la extrema simplicidad no requiere la ayuda de personal con experiencia. Los diferentes sistemas de instalación acentúan la flexibilidad de los productos y permiten el uso en entornos públicos y privados. Los sistemas acústicos de Gaber no requieren particular mantenimiento; la falta de espacios entre un panel y otro reduce la acumulación de polvo. La limpieza consiste en sistemas de aspiración en los elementos del tejido y un simple paño húmedo con agua tibia sobre las superficies de plástico.

ACOUSTIC PRODUCTS

TUNE

Forsix Design

Thanks to their original design, and the quality materials utilized, these panels are suitable for the most modern work-spaces or in prestigious hospitality settings.

[IT] I pannelli fonoassorbenti della famiglia Tune sono pensati per arredare con eleganza, nella precisa funzione di ridurre il riverbero sonoro.

[EN] The sound-absorbing free-standing panels of the Tune collection are designed both to furnish with elegance as well as to assure the precise function of reducing sound reverberation.

Tune free-standing

[IT] Accostati assieme, i pannelli possono essere utilizzati come pareti divisorie per delimitare aree di lavoro e per migliorare, anche temporaneamente, la privacy di salottini o tavoli riunione, sale congressi o aree open-space di centri commerciali. Fissati ai piani delle scrivanie come pratici schermi per valorizzare la privacy, i pannelli migliorano il comfort acustico, agevolando la concentrazione e il benessere nell'ambito degli ambienti di lavoro.

[EN] Combined together, the panels can be used as dividing-walls to delineate work areas and to improve, even temporarily, the privacy of waiting areas rooms or meeting areas, conference rooms or commercial settings. Fixed to the desk tops as practical screens to enhance privacy, the panels improve acoustic comfort, facilitating concentration and well-being in the workplace.

PIUMA

Studio Eurolinea Design

[IT] Il sistema di pannelli fonoassorbenti Piuma aiuta a migliorare l'acustica delle postazioni di lavoro, suddividendo tra loro i piani scrivania e creando una barriera visiva per ottimizzare la privacy.

Grazie a speciali staffe in tecnopoliomerio, i pannelli Piuma possono essere fissati ai piani, anche di diversi spessori. La configurazione dei piani di lavoro può essere cambiata rapidamente.

[EN] The sound-absorbing Piuma panel system helps to improve the work-station acoustics, dividing up worktops and creating a privacy screen. Thanks to their specially developed technopolymer brackets, Piuma panels can be fixed to different thickness desktops with the result that the layout of work-tops can be switched around quickly.

[FR] La ligne de panneaux insonorisants Piuma contribue à améliorer l'acoustique

sur les postes de travail, en divisant les bureaux entre eux, uniquement au niveau du plan de travail et en créant une barrière visuelle pour optimiser le privé. Grâce aux supports spéciaux en technopolymère, les panneaux Piuma peuvent être fixés directement sur les plateaux, de différentes épaisseurs. La configuration des plans de travail peut être modifiée rapidement et à tout moment.

[ES] El Sistema de paneles de absorción Piuma ayuda a mejorar la acústica de las estaciones de trabajo, dividiendo las encimeras entre ellas y creando una barrera visual para optimizar la privacy. Gracias a losportes especiales en tecno-polímero, los paneles Piuma pueden ser fijados en planos de diferente espesor; de esta manera es posible cambiar rápidamente la configuración de la mesa de trabajo.

ONDA

Studio Eurolinea Design

[IT] Grazie alla sua forma sinuosa ed al materiale utilizzato, la lampada Onda cela dentro di sé la magia del silenzio. Onda riempie di carattere gli ambienti, decorandoli, illuminandoli e fungendo anche da elemento fonoassorbente.

[EN] Thanks to its curved shape and to the material utilized, the Onda lamp lies within itself the magic of silence. Onda fills of personality any environments, decorating and lighting them, even improving acoustic comfort.

[FR] Grâce à sa forme courbée et au matériau utilisé, la lampe Onda cache en elle-même la magie du silence. Onda remplit les environnements de caractère, en les décorant, en les éclairant et même agissant comme un élément absorbant acoustique.

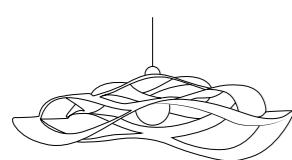

[ES] Gracias a su forma curvada y el material utilizado, la lámpara Onda oculta en sí la magia del silencio. Onda llena entornos de carácter, con decoración y iluminación, mejorando el confort acústico.

SPACE FOR IDENTITY

[IT] Sin dal 2000 Gaber propone sul mercato prodotti conformi alle più severe leggi di salvaguardia dell'ambiente e promuove a tutti i livelli la prevenzione dell'inquinamento ambientale, dallo smaltimento separato dei rifiuti sino alla produzione autonoma di energia grazie a impianti fotovoltaici di ultima generazione.

[EN] Since 2000 Gaber has always proposed products on the market complying with the environmental laws in the complete respect of the rules and it promotes the prevention of environmental pollution, from the separate disposal of waste to the independent energy production, thanks to the latest generation of photovoltaic systems.

[FR] Dès les années 2000, Gaber lance sur le marché des produits conformes aux sévères lois sur la sauvegarde de l'environnement. L'usine met en place, à tous les niveaux, un système de prévention de la pollution, en partant du traitement des déchets et en passant par la production autonome de l'énergie grâce à un système photovoltaïque de toute dernière génération.

[ES] Desde el año 2000 Gaber ofrece en el mercado productos que cumplen con reglas de salvaguardia del medio ambiente y promueve prevención a todos los niveles de contaminación ambiental, de disposición separada de residuos hasta la producción de la energía autónoma gracias a sistemas fotovoltaicos de ultima generación.

Design and sustainability
